

Yogesh Solanki

Full-Stack Mobile + AI Engineer | React Native · Node.js · LLM Integration

Rajkot, India · +91 9904654107 · solankiyogesh3500@gmail.com

[LinkedIn](#) · [GitHub](#)

Professional Summary

Full-stack mobile and web engineer with 4.5+ years of experience shipping production-grade applications across React Native, React JS, TypeScript, and Node.js. Proven track record leading teams of 5+ engineers, delivering AI-powered features (LLM integration, automated scoring, PDF generation pipelines), and optimizing performance at scale. Experienced working directly with international clients and open-source contributors with published React Native Turbo Modules. Actively expanding into AI/ML backend architecture and cloud infrastructure.

Technical Skills

Mobile	React Native (New Architecture / Turbo Modules), Flutter, Kotlin, Java, Dart
Frontend	React JS, TypeScript, JavaScript, Vite JS, Tailwind CSS, Next.js
AI / LLM	Anthropic API, OpenAI API, LangChain (learning), RAG pipelines, AI scoring systems
Backend	Node.js, Express, Django, REST APIs, Go (in progress), GraphQL
Database	PostgreSQL, Firebase (Firestore / Realtime DB), SQLite, Redis (learning)
DevOps	AWS (EC2, S3, Lambda), GitHub Actions, CI/CD, Docker (learning), App Store / Play Store
Architecture	Microservices, Offline-first sync, State management, Performance optimization

Professional Experience

Senior Full-Stack Mobile + AI Engineer | Arrcus IncJan 2025 – Present

- Built and shipped AI-powered cross-platform mobile apps maintaining a consistent 60fps UI on both iOS and Android.
- Integrated LLM APIs and third-party AI SDKs to deliver intelligent in-app features, improving user retention by measurable margins.
- Reduced initial load time by 40% through code-splitting, lazy loading, and native performance profiling.
- Led deep-linking and analytics instrumentation (Mixpanel / Firebase) across multiple app releases.

Team Lead – Full-Stack Mobile Engineer | Bitnet InfowayDec 2021 – Jan 2025

- Managed a team of 5+ engineers; introduced Agile/Sprint workflows that cut average delivery time by 25%.
- Architected and shipped 5+ production applications achieving 4.5+ star ratings on the Google Play Store.
- Designed scalable app architecture patterns (offline-first, modular feature splits) adopted across all company projects.
- Built features increasing user engagement by 40%; led client requirement workshops for international stakeholders.
- Mentored junior developers through code reviews, pair programming sessions, and internal tech talks.

Key Projects

Reeva – AI Real Estate Contract Platform — React Native · LLM Integration · Digital Signature [Link](#)

- Integrated an AI chat assistant and LLM-driven contract drafting engine, reducing document creation time by 70% for 500+ real estate agents.
- Engineered a high-performance PDF generation engine that dynamically populates complex legal clauses with 100% compliance accuracy.
- Implemented automated e-signature workflows and document state management using a custom async queue architecture.

Alfa – AI PTE Exam Prep App — *React JS · React Native · AI Scoring · EdTech* [Link](#)

- Delivered AI-driven scoring engine with 95% accuracy, serving 20,000+ learners and reducing manual grading time by 80%.
- Designed a micro-benchmarking pipeline to track AI model performance across student demographics.
- Built a real-time analytics dashboard enabling educators to monitor progress and generate automated reports.

Klizpy – Short-Video & Gamification App — *Flutter · Real-time · Firebase* [Link](#)

- Architected a gamified short-video platform achieving 10,000+ installs with 60% engagement boost.
- Built low-latency leaderboard system handling real-time scores for thousands of concurrent users via optimised state management.
- Implemented custom video caching logic reducing buffering by 50% on slow networks.

GamiNiVato – Farmer Marketplace App — *React Native · SQLite · Offline-first · AgriTech* [Link](#)

- Created a localized (Gujarati) marketplace for 5,000+ farmers enabling product sales and real-time yard price checks.
- Implemented offline-first data sync using SQLite; users can browse and transact without an internet connection.
- Improved rural tech adoption by 45% through localization and UX optimizations for low-literacy users.

Fyerdate – Social Media & Dating Platform — *React Native · Node.js · WebSockets · Full-Stack* [Link](#)

- Architecting a multi-feature social platform (shopping, video, real-time chat) targeting 100,000+ users.
- Building end-to-end encrypted private messaging and secure data handling protocols.
- Designing modular architecture to support seamless integration of future verticals (e-commerce, video broadcasting).

Open Source Contributions

Published 4 React Native Turbo Modules on npm:

- rn-video-cache — Turbo Module for caching online video playback in React Native apps.
- rn-camera-roll-fetcher — Lightweight TurboModule for reliable iOS asset URI conversion.
- rn-turbo-location-enabler — Utility to check and prompt users for location permissions.
- rn-real-path — Android utility resolving real file paths from content URIs.

Education

Diploma in Information Technology · Government Polytechnic Rajkot 2018 – 2021
